

Help shape the future of palliative care in WA

Join us at one of our service provider workshops to hear about consumer perspectives, explore current challenges, and identify solutions

You are invited to give a health provider perspective on the current challenges of providing palliative care in WA:

- hear about consumers' experiences of receiving palliative care from their feedback to the consumer survey
- actively contribute to solutions that can address unmet needs across the different palliative care settings: home, hospital, hospice, aged care/ nursing home.

This two hour workshop presents service providers with a valuable opportunity to help shape how palliative care is delivered across WA.

Limited numbers each session. Book online at <https://perroninstitute.org/independent-review-patient-perspectives-of-palliative-care/>

Chief Investigator: Prof Samar Aoun (Perron Institute and La Trobe University)

Associate Investigator: A/Prof Bruce Rumbold (La Trobe University)

Associate Investigator: A/Prof Lauren Breen (Curtin University)
